Installation

How to install:

1. You will see four screws on the front panel of the NDOR unit, and six mounting holes on the rack. (circles marked in red)

2. Remove the screws indicated in red on the front panel.

3. Align the NDOR unit with the rack, then secure it by fastening the six screws into the mounting holes

4. . Once the unit is installed, secure it to the server rack by fastening the four screws—two on each side. (Marked in green)
