	CAUTION	To prevent damage, do not drop the camera or subject it to strong shock or vibration.
	CAUTION	If installed close to a TV, radio transmitter, magnet, electric motor transformer or audio speakers the magnetic field generated may interfere with or distort the image.
	CAUTION	Whether or not the camera is used outdoors, never point it toward the sun. Use caution when operating the camera in the vicinity of spot lights or other bright lights and light reflecting objects.
	CAUTION	Do not use the camera in extreme environments where high temperatures or high humidity exists. Use the camera under conditions where temperatures are between 14°F ~ 122°F (-10°C ~ 50°C), and humidity is below 90%.

SETUP	SUB MENU	SUB MENU	DESCRIPTION
EDGE DET		ON/OFF	Edge detection allows you to easily adjust focus.
EXPOEURE	BRIGHTNESS	0~20	Adjust the screen brightness. The bright control function adjusts gain, to keep a brightness level.
	SHUTTER	AUTO	Shutter controls exposure automatically. Shutter control has the exposure control priority
		MANUAL	Shutter speed is fixed. The exposure control priority is given to other resources.
		FLICKER	Use this function when you experience picture flicker, this happens when there is a conflict with the installed lighting frequency.
	SENS-UP(DSS-Digital slow shutter)	NOT USED	NOT USED
	AGC	0~20	A function which controls the amplification/gain process automatically if the illumination falls under the usable level. Camera raises up gain to selected gain limit when dark conditions.
BACKLIGHT	HLC		Highlight the bright area with a masking box with a selected color. Adjust the masking level (0~20).
	BLC		Enable a back light compensation feature.
DAY&NIGHT	MODE	AUTO / COLOR / B&W / EXTERN	AUTO : Auto mode allows to switch between COLOR and B&W automatically depending on day and night. COLOR : The camera keeps color mode constantly. B&W : The camera keeps black/white mode constantly. EXTERN : In case illuminance sensor is mounted, you can switch between COLOR and B&W by its signal.(OPTION)
	IR LED(OPTION)	OFF/FULL	You can modulate brightness level of externally mounted IR LED.
	ANTI-SAT(OPTION)	0~20	In case external IR LED is used, saturated image by light can be decreased by level.
	EXTREN SW(OPTION)	LOW/HIGH	In case external illuminance sensor is mounted, you can match COLOR and B&W by level of its signal.
	D>N THRES	0~20	You can modulate illuminance point from DAY to NIGHT.
	N>D THRES	0~20	You can modulate illuminance point from NIGHT to DAY.
	DELAY	LOW/MIDDLE/HIGH	Select the checking time of light condition to confirm to change from the day mode to the night mode. When you change DAY mode to NIGHT mode, or NIGHT mode to DAY mode, converting time can change to three levels in order to avoid hunting.
COLOR	AWB	AUTO/AUTOext/ PRESET/MANUAL	AUTO : Color temperature is automatically adjusted to 3,000°K ~ 8,000°K AUTOext : Continuously adjusts camera color balance in accordance with any change in color temperature. Compensates for color temperature changes within the range of 1,900K to 11,000K. PRESET : Color temperature will be manually adjusted by pushing the OSD button. Place the white paper in front of the camera when OSD button is pressed to obtain the optimum result. Manual : Select color temperature from 3000°K, 5000°K or 8000°K.
	COLOR GAIN	0~20	Adjust the color level value for a fine color tune.
DNR	LOW/MIDDLE/HIGH		This feature will reduce the video noise at low ambient light.
IMAGE	SHARPNESS	0~10	Adjust the sharpness of the image. As you increase this value, the picture outline becomes stronger and clearer.
	GAMMA	0.45 ~ 0.75	This feature will adjust video output brightness (0.45 ~ 0.75).
	MIRROR	ON/OFF	Video output is rotated horizontally.
	FLIP	ON/OFF	Video output is rotated vertically.
