BORDERLESS

Powerful NDI Routing, Scheduling,
Recording, and Multiview Solution

The perfect choice for broadcast, education,
government, worship, and live events

Overview

BORDERLESS is an innovative, NDI-based centralized management and control solution. It is purpose-built for **broadcast studios, streaming environments, multi-channel recording systems,** and **facility-wide AV monitoring and control.**

Key Features

- **Intuitive control UI** for NDI routing, monitoring, and automation
- **Redundancy support** with stream duplication and automatic failover
- **High-performance NDI** recorder capable of recording dozens of channels to NAS or local storage

NDI 라우팅

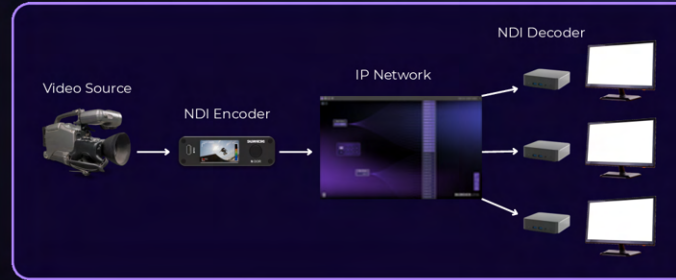

Flexible and Powerful NDI Routing Engine

- Supports **1:N** and **N:M** routing configurations
- Visual routing via **graphic mode and patch mode**
- **Preset saving** for instant source switching
- **Node grouping** and **PTZ camera control** support

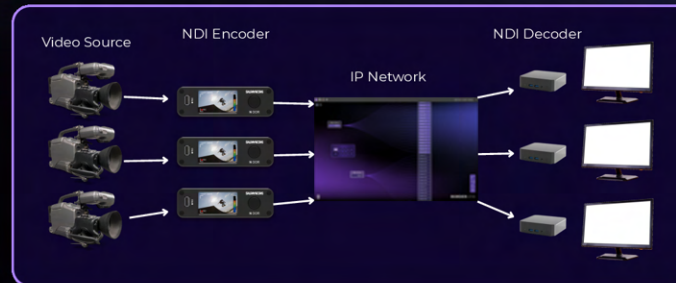

Use Cases

1:N

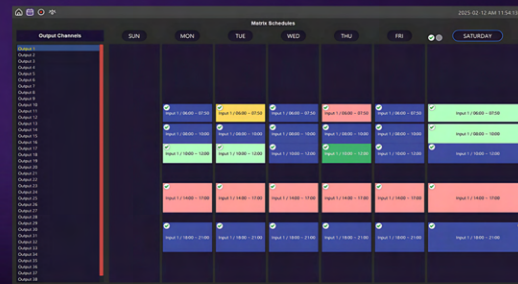

N:M

Scheduling Router

Time-Based Routing Automation

- Configure **weekly and hourly schedules** per output channel
- Define **input source, start/end times, and descriptions**
- Enhanced visibility with a **color-coded schedule view**

Recording Router

- Schedule recordings based on **matched input sources**
- Save NDI sources in **MP4 format**
- Supports storage to **NAS** or **local drives**

Multiviewer

- View **16, 25, or 36 NDI sources** simultaneously
- Integrated PTZ **camera control**
- Real-time audio monitoring with **audio level meters**
